U.S. Citizen in Covina, CA

Education

- B.S in Computer Science from Cal Poly Pomona
- Status - Graduated

Projects

NBA Statistics Application

Jan 2026 - Current

- Developed a web application in JavaScript, Python, SQL, HTML, CSS in an AWS environment for retrieving, processing, and displaying NBA teams and player statistics.
- Implemented React frontend that communicates with the Python backend through RESTful API endpoints.
- Used SQL and MongoDB for storing and querying player and game data, for fast real-time access to player or team data.

Wilderness Survival Game

Sep 2024 - Dec 2024

- Implemented an entertainment application in JavaScript, Java, HTML, CSS in an AWS environment for users to interact with a survival game set in the wilderness.
- Integrated React and JavaScript with asynchronous RESTful APIs for player movement, game progression, trading, vision settings, strategy hints, and automated gameplay.
- Implemented Java REST API endpoints using Javalin and Gson to connect backend game logic with React frontend interface.

Hyprrland Scrolling Overview Mode

Nov 2025 - Current

- Extended and contributed to the C++, open-source Hyprrland plugin, Hymission, with a scrolling workspace overview and window management for Linux machines.
- Implemented with the Hyprrland API animated workspace transitions, window positioning, focus handling, and dynamic layout reflow for the scrolling layout.
- Debugged compositor-level rendering, input, animation, and state-management issues in the existing large C++ codebase.

Technical Skills

- Languages:** C++, JavaScript/TypeScript, Python, Java, C, Bash, SQL
- Web Development:** React, HTML, CSS, Tailwind CSS
- Tools & Technologies:** Git, GitHub, Linux, AWS EC2
- Backend & Databases:** Javalin, Node.js, REST APIs, MongoDB
- Relevant Coursework & Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Unit Testing, Software Engineering
